

**WORKSHOP ON LIPIDOLOGY AND
ATHEROSCLEROSIS**

Scientific Organizers:

Prof. E. Favari, University of Parma

Prof. L. Pisciotta, University of Genoa

**Scientific Program**

Wednesday, May 17th 2017

13.00-13.25 Homozygous Familial Hypercholesterolemia (Ho-FH): updates of prevalence, genetics and therapeutical approaches.

Claudia Stefanutti (Rome, Italy)

13.25-13.50 Clinical management of Heterozygous Familial Hypercholesterolemia (He-FH).

Handrean Soran (Manchester, UK)

Selected Abstracts

14.10-14.35 Hypertriglyceridemia in the genomic era: risk of ischemic heart disease and pancreatitis.

Anne Tybjaerg Hansen (Copenhagen, Denmark)

14.35-15.00 HDL, SR-BI and PCPE2: Novel partners in bi-directional cholesterol transport in adipose tissue.

Mary Sorcy-Thomas (Milwaukee, USA)

Coffee Break

15.30-15.55 Role of autoimmunity against HDL.

Nicholas Vuilleumier (Geneva, Switzerland)

Selected Abstracts

16.15-16.40 HDL functionality as a new possible clinical biomarker.

Elda Favari (Parma, Italy)

Selected Abstracts

17.00 End of Session
