

How to survive after a PhD thesis

Dr David Karlin
CAPE/Cosens, Marseille

5th-7th October, 9:00 AM- 5:00 PM
Salone CSU, Podere La Grande
Parco Area delle Scienze, 169/C

In today's highly competitive environment, all funded researchers are highly competent scientifically. It is their skill set in other areas that makes the difference, such as obtaining jobs and funding, setting up collaborations, managing their time wisely, being creative, negotiating... Of course, these skills are equally useful if you leave research after your PhD.

In this 3-day workshop, we will see what paths are open to you with a PhD in science, what skills you need to develop, and what you need to have proven for each career choice. You will learn how to develop these skills and how to make the most of your talents, both from a scientific and from a managerial point of view.

Please contact Prof. Barbara Montanini (barbara.montanini@unipr.it) or Prof. David Karlin (davidkarlin@gmail.com) for further information on this course. Course handouts and supporting electronic material will be available.

*Course organized by Prof. Nelson Marmioli
coordinator of PhD in Biotechnology and Life Science
Dipartimento di Bioscienze (Università di Parma)*
