17.2.1	Does your university have direct involvement in, or input into, national government or regional nongovernment organisations SDG policy development - including identifying problems and challenges, developing policies and strategies, modelling likely futures with and without interventions, monitoring and reporting on interventions, and enabling adaptive management?	Yes			https://www.regione.emilia-romagna.it/pattolavoroeclima/il-patto-per-il-lavoro-e-per-il-clima/ese-patto-per-il-lavoro-17x24cm_en_web.pdf	The University of Parma is a signatory of the Emilia-Romagna Pact for Work and Climate, contributing to regional SDG policy development through shared strategies for climate neutrality and renewable energy transition. In addition, the University is among the official signatories of Parma's Climate City Contract, part of the EU Mission 'Climate- Neutral and Smart Cities,' which sets out a co-created roadmap of over 130 actions to achieve carbon neutrality by 2030. Through these commitments, the University provides scientific expertise and stakeholder engagement to identify challenges, design policies, model future scenarios, and support adaptive management for sustainable urban and regional development.			Yes			https://www.regione.emilia-romagna.it/pattolavoroclimaeconomiasociale/patto-per-il-lavoro-per-il-clima-per-economia-sociale	In September 2026, the University of Parma signed Emilia-Romagna's renewed Pact for Work, Climate and the Social Economy, joining a regional framework for shared strategies on social, economic and environmental challenges. contributing to regional SDG policy development through shared strategies for climate neutrality and renewable energy transition. In addition, the University is among the official signatories of Parma's Climate City Contract, part of the EU Mission 'Climate- Neutral and Smart Cities,' which sets out a co-created roadmap of over 130 actions to achieve carbon neutrality by 2030. Through these commitments, the University provides scientific expertise and stakeholder engagement to identify challenges, design policies, model future scenarios, and support adaptive management for sustainable urban and regional development.

17.2.2	Does your university as a body initiate and participate in cross-sectoral dialogue about the SDGs, e.g. conferences involving government/NGOs?	Yes			https://www.unipr.it/en/node/106427	The University of Parma actively initiates and participates in cross-sectoral dialogue on the SDGs through its membership in the Italian Network of Universities for Sustainable Development (RUS). This platform brings together universities, government bodies, NGOs, and private organizations to share best practices and co-develop strategies aligned with the UN 2030 Agenda. The University contributes by organizing and joining conferences, workshops, and thematic working groups on energy transition, climate neutrality, and social sustainability, fostering collaboration between academia and public institutions. 17.2.3	Does your university as a body participate in international collaboration on gathering or measuring data for the SDGs?	Yes			https://eugreenalliance.eu/transforming-eu-higher-education-eu-greens-innovative-approach-to-sustainability/	The University of Parma participates in international collaborations to gather and report data on the SDGs through initiatives such as: 1) EU GREEN Alliance, which collects among its members data about teaching and research in the sustainability field; 2) the UI GreenMetric World University Ranking, which collects global sustainability indicators on energy, waste, transportation, and education. Additionally, the University is a signatory of the SDG Accord, committing to monitor and share progress toward the UN 2030 Agenda within a global reporting framework. These actions demonstrate the University’s engagement in standardized data collection and benchmarking to support international efforts on sustainable development.			Yes			https://www.eua.eu/images/publications/Publication_PDFs/EUA_Sustainability_report_Annexes.pdf	The University of Parma participates in international collaborations aimed at gathering and measuring data related to sustainability and the SDGs. In particular, the University contributed to the Sustainability and greening in European higher education survey coordinated by the European University Association (EUA), providing institutional data that support international benchmarking and analysis of sustainability practices across European universities. In addition, the University participates in the UI GreenMetric World University Ranking, which collects standardized sustainability indicators on areas such as energy, waste, transportation, water, and education, enabling global comparison among higher education institutions. The University is also actively involved in the EU GREEN Alliance, where sustainability-related information and indicators are shared among partner universities to support joint initiatives and monitoring activities. Furthermore, the University is a signatory of the SDG Accord, reinforcing its commitment to monitoring and reporting progress towards the UN Sustainable Development Goals within an international framework. These activities demonstrate the University’s engagement in the collection, sharing, and benchmarking of sustainability-related data at both European and global levels.

17.2.4	Does your university as a body, through international collaboration and research, review comparative approaches and develop international best practice on tackling the SDGs?	Yes			https://eugreenalliance.eu/mission-vision/	EU GREEN is built around a true perspective of sustainability, encompassing the economic, societal, cultural andenvironmental dimensions of the term andtheir impact on one another. The approach of the alliance is closely aligned with the Sustainable Development Goals across all four of our core missions: education, research, innovation and service to society.			Yes			https://eugreenalliance.eu/	In 2026, the University of Parma participated in EU GREEN's Sustainable & Healthy Campus workshop in Évora. Representatives of the nine partner universities reviewed campus activities, achievements and challenges, shared lessons learned, and discussed evaluation and future priorities for sustainable campuses. UniPR also coordinated the launch of BUILDERS, bringing together 11 partners from Europe and Brazil, including EU GREEN universities, to develop shared research approaches to monitoring and managing invasive alien species.		
17.2.5	Does your university as a body collaborate with NGOs to tackle the SDGs through:	Yes	student volunteering programmes	Yes	https://www.cuci.unipr.it/en/	Examples of collaborations with professional networks.			Yes	student volunteering programmes	Yes	https://www.unipr.it/en/node/106896	The University of Parma collaborates with NGOs on initiatives supporting the SDGs. The examples below refer to activities carried out during the last year. In 2026, it partnered with Legambiente for the national campaign "Puliamo il Mondo", promoting student involvement in campus clean-ups and environmental awareness activities. The initiative contributed to SDGs 11, 12, 13 and 15. Through its University Centre for International Cooperation (CUCI), the University also completed the UNITAFRICA project in March 2026. Within the project, the University and Ashoka jointly developed and delivered a 2025 Summer School on social and gender equality, supporting SDGs 4, 5, 10 and 17. These collaborations show the University's direct engagement with national and international NGOs in jointly designed and implemented environmental and social initiatives, while documenting activities and their contribution to the SDGs.

ER.GO's annual performance report provides quantitative results on measures designed to reduce economic barriers to higher education, including financial aid recipients, scholarship coverage, accommodation support, and targeted measures for students in vulnerable situations. It also reports scholarships awarded to eligible University of Parma students and dedicated schemes for categories such as student caregivers and students with severe disabilities. These published results demonstrate progress in promoting equitable access and reducing economic disadvantage. Progress is documented in ER.GO's public "Relazione sulla performance 2025", which includes monitored indicators and outcomes on student support and inclusion.

17.3.2	Please indicate if your university publishes progress against SDG2	Yes	overall report	Yes	https://www.unipr.it/sites/default/files/2025-05/Versione%20aggiornata_Bilancio%20Sostenibilita%CC%80%20Unipr.pdf	The University of Parma defines its sustainability objectives and alignment with the SDGs through its Strategic Plan (Piano Strategico dell'Università di Parma), embedding the UN 2030 Agenda into institutional priorities. Progress toward these goals is monitored and publicly reported every two years in the Sustainability Report (Bilancio di Sostenibilità), which links the University's achievements to the relevant SDGs, providing transparent information on actions and outcomes. Both documents are accessible online, ensuring accountability and continuous improvement.			Yes	overall report		https://www.er-go.it/amministrazione-trasparente/performance/relazione-sulla-performance/relazione-sulla-performance-2025.pdf/@@download/file	The University of Parma publishes information on its contribution to SDG 2 (Zero Hunger) through the public reporting activities of ER.GO – Regional Agency for the Right to Higher Education, which manages student welfare services on behalf of the regional higher education system, including catering services and related financial support. ER.GO's annual performance report provides data and indicators on university catering services, including access to subsidised meals and support measures for eligible students. It documents the outcomes of actions aimed at ensuring affordable access to food and monitoring the provision of catering services within the higher education system. With this publicly available reporting framework, progress relating to food accessibility and student support is transparently monitored and communicated, contributing to SDG 2. The University of Parma relies on this system to monitor and report outcomes associated with student catering and food support services

Yes	overall report	yes	https://www.unipr.it/sites/default/files/2026-06/RUA_Parte_II_Didattica_2025.pdf	The University of Parma publishes progress relating to SDG 3 (Good Health and Well-being) through its annual Consolidated University Report (RUA). In Part II, Section 14 ("Psychological Counselling"), the University reports indicators and outcomes associated with student mental health and well-being services. The 2025 report records 504 users of the psychological counselling service, compared with 481 in 2024, demonstrating the monitoring of service uptake over time. The report also includes participation data for the PRISMA student well-being project. By publicly reporting these activities and related indicators, the University provides transparent evidence of its actions and progress in promoting health and well-being within the university community, in line with SDG 3.

The document analyses energy consumption, renewable energy production, greenhouse gas emissions and Energy Performance Indicators (EnPIs) across its campuses. It reports historical data for 2022–2024 and establishes a framework for annual monitoring and reporting. Indicators cover renewable energy generation, energy use and energy efficiency. The document reports photovoltaic systems with a total installed capacity of 867 kWp and monitors the share of electricity demand met by on-site renewable generation. It also publishes targets and planned actions to increase renewable energy production and improve the energy performance of the University estate. By publicly reporting energy data, indicators, results and future targets, the University provides transparent evidence of its progress towards affordable and clean energy and the sustainable management of energy resources, in line with SDG 7.

The report covers waste prevention, resource management and circular economy actions, together with quantitative data on waste generation and disposal. In particular, the University reports annually on special waste, including laboratory, healthcare, veterinary and electronic waste streams, and describes measures adopted to improve waste segregation and resource efficiency across its campuses. It also documents initiatives to reduce single-use plastics, promote responsible resource consumption, improve waste management practices and support circular economy approaches. Furthermore, the report identifies improvement objectives and monitoring actions relating to waste reduction, sustainable procurement and material reuse. By publicly reporting indicators, actions and results, the University provides transparent evidence of its progress towards SDG 12.

17.3.14	Please indicate if your university publishes progress against SDG14	Yes	overall report	Yes	https://www.unipr.it/sites/default/files/2025-05/Versione%20aggiornata_Bilancio%20Sostenbilita%CC%80%20Unipr.pdf	The University of Parma defines its sustainability objectives and alignment with the SDGs through its Strategic Plan (Piano Strategico dell'Università di Parma), embedding the UN 2030 Agenda into institutional priorities. Progress toward these goals is monitored and publicly reported every two years in the Sustainability Report (Bilancio di Sostenibilità), which links the University's achievements to the relevant SDGs, providing transparent information on actions and outcomes. Both documents are accessible online, ensuring accountability and continuous improvement.			Yes	overall report	Yes	https://www.unipr.it/en/node/111305	The University of Parma publishes progress relating to SDG 14 (Life Below Water) through its institutional reporting and public communication activities. Information on research, monitoring and outreach initiatives addressing the protection of aquatic ecosystems is regularly disseminated through official University channels. In 2026, the University reported its participation in the FreshWater Watch Parma initiative, which focused on groundwater quality, freshwater ecosystems and their conservation. The University publicly communicates the objectives, activities and outcomes of such initiatives through its official website and sustainability reporting, providing transparent evidence of its contribution to the protection and sustainable management of aquatic environments, in line with SDG 14.

17.4.2	Does your university as a body have dedicated courses (full degrees, or electives) that address sustainability and the SDGs?	Yes			https://corsi.unipr.it/en/cerca-insegnamenti?titolo=sustain&lingua_insegnamento=&docente=&aa_offerta=2023	Starting from the 2018/2019 academic year, the University of Parma has asked lecturers to indicate in the web page application of our university the connection of their courses with SDG 2030 goal. The field is not compulsory, its function has been formative. Considering that several years have passed since the implementation of this information and that the university has been involved through awareness-raising on this issue, it can be assumed that as from the academic year 2023/24, sustainability-related courses can be identified through the links indicated for each of them with one or more of the 17m Sustainable Development Goals (SDGs). These links are part of the information that each lecturer in charge of a course must explicitly provide through the software usedm by this university to manage its coursem offerings.			Yes			https://corsi.unipr.it/en/cerca-insegnamenti?titolo=sustain&lingua_insegnamento=&docente=&aa_offerta=2026	The University of Parma offers dedicated courses addressing sustainability and the Sustainable Development Goals across multiple disciplines. Since the 2018/19 academic year, the University has invited lecturers to identify the SDGs addressed by their courses through the institutional course catalogue system. This initiative has increased awareness of the 2030 Agenda within teaching and enabled the systematic identification of sustainability-related courses across the University’s educational offer. As a result, students can access courses specifically focused on sustainability topics, including courses whose titles explicitly refer to sustainability and sustainable development. These courses are publicly listed in the University catalogue and are available to students enrolled in different degree programmes. Through this approach, the University promotes education for sustainable development and supports the integration of SDG-related themes throughout its curriculum.

17.4.3	Does your university as body have dedicated outreach educational activities for the wider community, which could include alumni, local residents, displaced people?	Yes	alumni	Yes	https://elly2024.didattica.unipr.it/course/view.php?id=4590	The University of Parma organizes dedicated outreach educational activities for the wider community. For example, in February 2025, the University opened its course on Climate Change—part of the Master's Degree in Environmental and Territorial Engineering— to all citizens, offering 12 free online lectures without prerequisites. This initiative, linked to the 'Parma Climate Neutral 2030' program, aims to raise awareness and provide accessible education on climate science, mitigation and adaptation strategies, and global policy frameworks such as the Paris Agreement. These actions demonstrate the University's commitment to inclusive education and community engagement on sustainability.			Yes	alumni	Yes	https://elly2024.didattica.unipr.it/course/view.php?id=4590&lang=en	The University of Parma carries out dedicated outreach educational activities on sustainability and the SDGs for the wider community. In 2026, the University opened its Climate Change course to the public, allowing external participants to attend all 12 lectures without prerequisites. The University also organised the Parma Sustainable Development Festival, which included public lectures, workshops and educational activities for local schools on topics such as biodiversity, citizen science and sustainable development. Through these initiatives, the University extends sustainability education beyond its student population, engaging local residents, schools and other members of the wider community in learning and discussion around the SDGs.

17.4.4	Does your university as a body measure the sustainabilityliteracy of students?	Yes			(allegato non incollabile)	The "Ateneo Sostenibile" subgroup on Education and Training is planning to initiate a survey among students of the university regarding sustainability. The documentation of sustainability-related experiences organised by students was a first step in the research work to be promoted.			Yes			https://www.unipr.it/node/111437	The University of Parma measures the sustainability literacy of its students through surveys specifically designed to assess knowledge, attitudes and behaviours related to sustainable development. In particular, within the framework of the EU GREEN European University Alliance, the University participated in the CRESD (Collaborative Research in Education for Sustainable Development) project, which involved the administration of a questionnaire to students across bachelor's, master's and doctoral programmes. The survey explored students' understanding of sustainability issues, their attitudes towards sustainable development and their related behaviours. The results provide evidence to support the monitoring and continuous improvement of sustainability education and SDG integration across the University. The University also participates in broader sustainability surveys and assessments conducted within the EU GREEN Alliance to inform institutional sustainability strategies.
