

Workshop
Parma, 21th June, 2012

UNIPR CO-LAB

**Innovation
in teaching and learning
using technology**

UNIVERSITÀ DEGLI STUDI DI PARMA

**via Università 12
Sala del Consiglio**

In the framework of the Tempus Project “Advanced M.Sc. Program in Ecology for the Volga-Caspian basin”, this Workshop fits into the strategic goals of Russian universities, focusing on support for active teaching and learning methods.

The University of Parma (EU 4) was one of the first EU universities to introduce the new three-year plus two-year degree courses according to the Bologna Principles, providing the first new undergraduate courses in 1999. Therefore, the University has a wealth of experience to offer new types of degree courses.

The main principles of the Bologna Declaration have been implemented by the University of Parma, namely: Modular structure of the Curricula; ECTS as the basis of planning educational hours for students and a means for providing mobility; Introduction of the EU based quality assurance system.

Specific Objectives of the Workshop:

- **to present the history and the status of IT applications in learning and teaching in the University of Parma;**
- **to share teaching methods, tools and material with Parma University Professors according to the European experience of Bologna Process;**
- **to discuss issues and trends of e-tools for innovating teaching and learning.**
